

Crust  
The crust is 5 km thick  
The crust is 200°C - 400°C  
The crust is solid  
The crust is solid rocks  
inner core  
The core is made of metal like  
Iron and nickel  
The core is solid  
The core is 5,200°C  
The core is 1,250 km thick

outer core  
The outer core is 2,200 km thick  
The outer core is 4,500°C - 5,500°C  
it is made of liquid iron and  
nickel  
The core is liquid

Mantle  
is made of silicates  
The mantle is solid  
The mantle is 2,900 km  
it is 3,700°C
